

The Future of Supply Chain is Here

"The Demand Driven Planner Program was a cornerstone of our lotion pumps business transformation. We now offer much shorter lead times (down by 75%) with 100% service."

Vincent Thibault, Global Lean Director, ALBEA Group

DUBLIN, IRELAND
2 DAY CLASS – 8th & 9th Nov 2018

IPICS

The Supply Chain Management Institute

Hosted by

The Demand Driven Planner (DDP) program is designed for planning, purchasing and supply chain personnel interested in and responsible for implementing and maintaining a DDMRP implementation. Designed by the leading subject matter authorities at the Demand Driven Institute, the Demand Driven Planner program is comprised of 13 modules of in-depth DDMRP education. Find the complete program information [HERE](#).

Official Preparatory
Education for:

What is DDMRP?

Demand Driven Material Requirements Planning is a multi-echelon planning and execution method to protect and promote the flow of relevant information and materials through the establishment and management of strategically placed decoupling point stock buffers. DDMRP is the supply order generation and management engine of a Demand Driven Operating Model (DDOM). DDMRP can best be summarized as...

Position. Protect. Pull.

Unite the Organization

"DDMRP not only offers a comprehensive methodology for improving the flow of operations (both finance and product) but has a powerful conceptual force to unite the entire organization around customer satisfaction."

Felipe Gonzalez, President, Acerias de Colombia - ACESCO

Major DDMRP adopters include:

Education That Changes Companies

“Our team used the **Demand Driven Planner Program** to start an implementation of DDMRP throughout our supply chain.”

Brian Dooley, Senior Manager Supply Chain, BT

“With **DDMRP** we have nearly eliminated expedites, inventory down is 25% in 4 months and we have no Stock Outs.”

Fernando Plaza, Manager, IFAM

DDMRP Benefits	Typical Improvements
Customer Service	Users consistently achieve 97-100% on time fill rate performance.
Lead Time Compression	Lead time reductions in excess of 80% have been achieved in several industry segments.
Right-sizes Inventory	Typical inventory reductions of 25-45% are achieved while improving customer service.
Lowers total supply chain cost	Costs related to expedite activity and false signals are largely eliminated (fast freight, partial ships, cross-ships, schedule break-ins).
Easy and Intuitive	Planners see priorities instead of constantly fighting the conflicting messages of MRP.

Join the thousands of people around the world that have discovered a practical, intuitive and proven better way to manage a supply chain.
